Arkansas Film Database

Capstone II

Final Project

Melissa Ecker

April 30, 2026

Project Overview

Client: Arkansas Economic Development Group

Goal: Promote Arkansas film industry and talent

Deliverable: Interactive public-facing website

Audience: Residents, tourists, film enthusiasts, businesses

Problem Statement

Arkansas lacked a centralized digital platform for film heritage

Limited visibility of Arkansas actors, actresses, and filming ties

Need for modern low-cost promotional solution

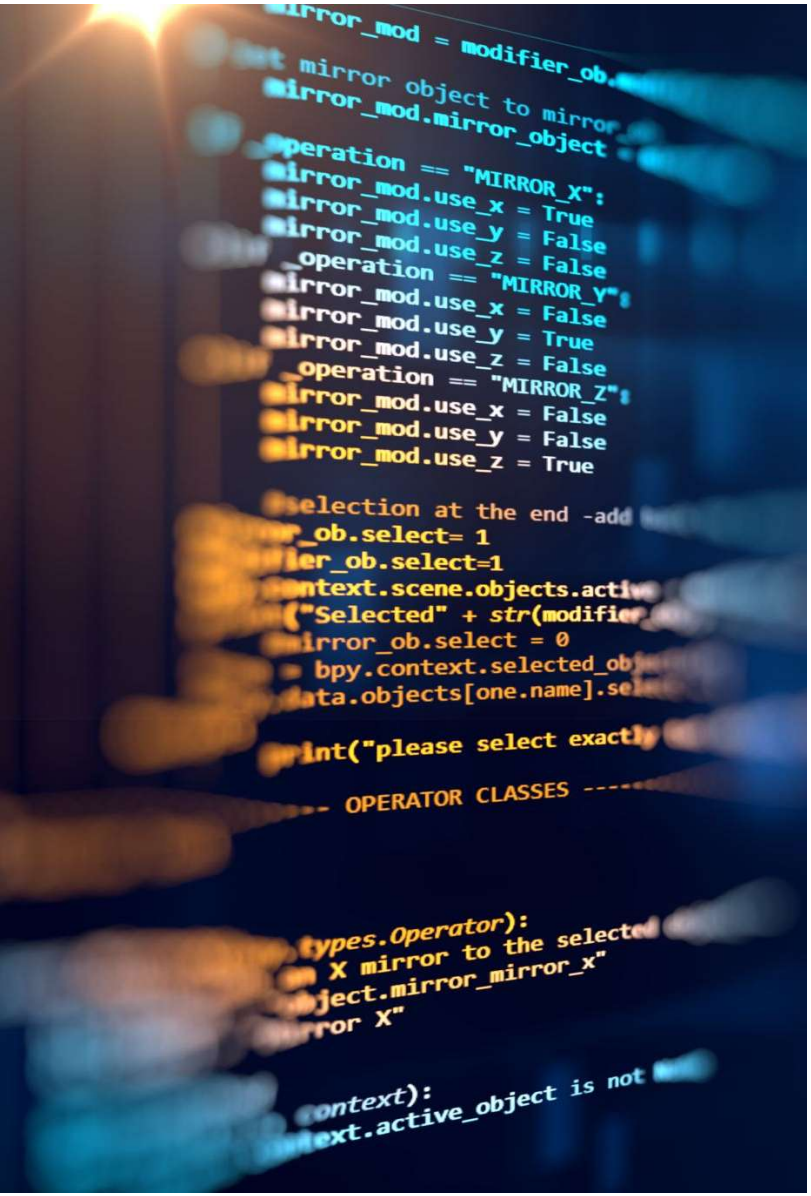
Proposed Solution

Custom web application using HTML5, CSS, JavaScript

Live data integration from TMDB API

Reusable film and actor detail pages

Search feature for movies and people



Technologies Used

Frontend: HTML5, CSS, JavaScript

API: The Movie Database (TMDB)

Hosting: GitHub Pages

Version Control: Git / GitHub

Key Features

- Clickable film posters and actor profiles
- Dynamic movie detail pages
- Dynamic actor detail pages
- Clickable cast and filmography links
- Arkansas-specific awards and connection data

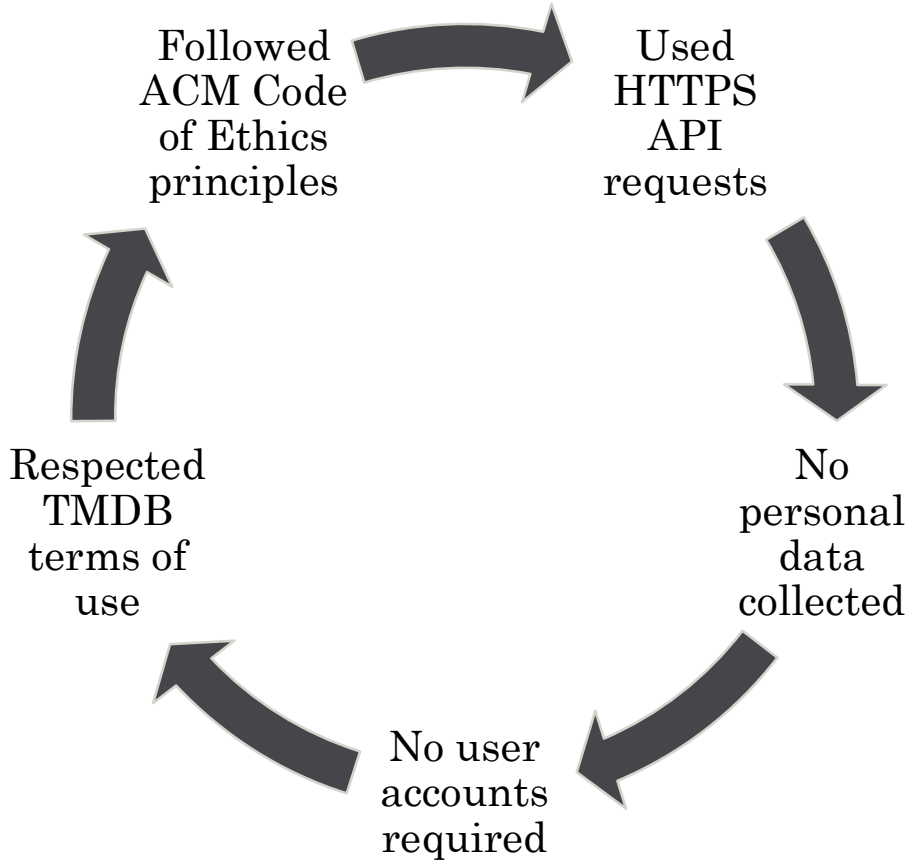
Design & Development

- Planned using charter and milestone schedule
- UI templates created before coding
- API endpoints tested and integrated
- Iterative debugging and usability improvements

Testing & Deployment

- Search testing
- Navigation testing
- Browser compatibility checks
- Responsive layout testing
- Deployed successfully via GitHub Pages

Ethics / Security



Support & Future Enhancements

- Monitor API availability
- Fix broken links/images
- Add trailers and location maps
- Expand to directors/producers
- Possible future database backend

Outcomes & Lessons Learned

- Completed ahead of schedule
- Met labor-hour estimates
- Learned real-world API integration
- Reusable templates save time
- Testing edge cases is essential

Thank You
